

## 426 E Prospect Street

In 2018, the property was extensively remodeled with new electrical and plumbing systems, updated HVAC components (the furnace had been previously replaced by prior owners), new windows and doors, refinished original hardwood floors, and fresh interior paint and lighting throughout.

The kitchen and bathrooms were completely remodeled with new cabinetry, quartz countertops, tile, and modern fixtures.

An addition was completed to expand the master suite and a third bedroom, adding new walk-in closets to both and a fully rebuilt master bathroom.

Exterior work included new siding and paint, new gutters and roof on the addition, and an upgraded garage door system.

In 2019 the outdoor living areas were improved with a 400+ square foot back deck, stone retaining wall, custom wood privacy fence, and professional landscaping.
